-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1, 2, 12, 16, and 20-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Ichida et al (US 7,061,228)

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in

Art Unit: 3682

the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Ichida et al disclose an automatic shift control apparatus for a bicycle that has a front transmission and a rear transmission, each transmission having a plurality of gear steps (col. 2 lines 42-67), wherein the apparatus comprises: a travel condition sensing unit (22,25); and a control unit (11) that operates one of the front transmission and the rear transmission in priority to the other one of the front transmission and the rear transmission based on the travel condition (col. 5 lines 31-40).

Re claim 2, the control unit operates the one of the front transmission and the rear transmission in priority to the other one of the front transmission and the rear transmission based on a rate of change of the travel condition (well known).

Re claim 12, the control unit compares the travel condition to an upshift value to determine the one of the front transmission and the rear transmission to upshift (col. 5 lines 31-40).

Re claim 16, the control unit compares the travel condition to a downshift value to determine the one of the front transmission and the rear transmission to downshift (col. 5 lines 31-40).

Re claim 20, the travel condition sensing unit senses bicycle velocity (well known).

Re claim 21, the travel condition sensing unit senses bicycle acceleration (well known).

Re claim 22, the front transmission comprises a plurality of front sprockets and an electrically controlled front derailleur to engage a chain among selected ones of the plurality of front sprockets, and wherein the rear transmission comprises a plurality of rear sprockets and an electrically controlled rear derailleur to engage a chain among selected ones of the plurality of rear sprockets (col. 2 lines 54-67).

Allowable Subject Matter

4. Claims 3-11, 13-15, and 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
